

Don't have the time for a traditional BLS class? Try Remote BLS Training.

- **Remote hands-on CPR & First Aid is ideal for classes of 1-6 people. You can be located anywhere. All you need is a webcam and connection to the Internet.**
- **This is NOT an online-only CPR class. Because CPR training MUST have hands-on training.**

With Know CPR's remote Basic Life Support (BLS) CPR training, you complete an interactive online component and then practice your skills in front of a live CPR instructor via a 2-way video-audio call on manikins that we have mailed to you. This remote skills session lasts approximately 40 minutes.

After successfully completing the online and the remote hands-on skills session, you will be emailed your nationally-recognized **American Safety & Health Institute** BLS certificate, which is valid for 2 years.

5 EASY STEPS:

Remote BLS Renewal Class	
Step 1.	Contact Know CPR to set up your remote hands-on skills evaluation session and tell us where to mail the manikins.
Step 2.	Receive an email with a link to an interactive online course that must be completed prior to the remote hands-on training session.
Step 3.	Receive a link to join the remote 2-way audio-video call (approx. 40 min) to practice skills before a live instructor.
Step 4.	Receive nationally-recognized CPR certificate valid for 2 years.
Step 5.	Return equipment in original box with the prepaid postage within 14 days to receive a complete refund of your deposit.
